FUGAWI X-TRAVERSE SUPPORTS HILTON'S REALTIME-NAVIGATOR ONLINE CHARTS

Software Leader's Partnership with Innovative Online Fishing Map Server Marks Exciting New Chapter in Offshore Fishing Capabilities Using Fugawi Navigation Software and iNavX for iPhone™

TORONTO, Canada – Software manufacturer Northport Systems Inc. announced today the addition of Hilton's Realtime-Navigator support to its online Fugawi X-Traversal collection for use with Fugawi™ navigation software, Apple iPhone™ and MacENC for Apple OS X. The combination of Fugawi X-Traversal and Hilton's Realtime-Navigator gives users an unparalleled set of ocean condition tools to identify fish holding locations. The ultimate saltwater fishing tool, Fugawi X-Traversal provides users of the iPhone, PCs or Macs with the most up-to-date water condition detail.

Hilton's Realtime-Navigator provides boaters with unlimited access to the latest sea surface temperature, altimetry, water color and surface currents, allowing anglers to plan and implement strategies to locate favorable conditions for targeting desired fish species. Fugawi X-Traversal's support for the innovative Realtime-Navigator information allows users to see their GPS position on saltwater maps using the popular iNavX software for iPhone, Fugawi Marine ENC navigation software for a PC or MacENC software for Mac OS X.

"Hilton's Realtime-Navigator gives the saltwater angler a powerful new tool," said Robin Martel, president of Northport Systems. "Providing up-to-date maps of sea conditions as a complement to our already broad feature set gives Fugawi X-Traversal customers a tremendous advantage to help them target and catch fish."

With the addition of Hilton's Realtime-Navigator maps to its Fugawi X-Traversal system, users can now download up-to-date maps directly from the internet to their navigation software. Ideal also as a planning tool, Fugawi X-Traversal users can access Realtime-Navigator information in the days preceding a fishing excursion to determine ocean current, color, temperature and altimetry tendencies that often affect baitfish location. In addition, the Fugawi X-Traversal data plan allows users to plot waypoints and save tracks in Fugawi Marine ENC and transfer them to iNavX software on the iPhone, or vice versa.

“This is a game-changer,” said Thomas Hilton, president of Hilton’s Fishing Charts. “Our partnership with Fugawi provides offshore anglers unparalleled abilities to use the latest high-resolution water condition imagery to navigate to the most-productive fishing grounds, while at the same time maximizing their time and fuel efficiency.”

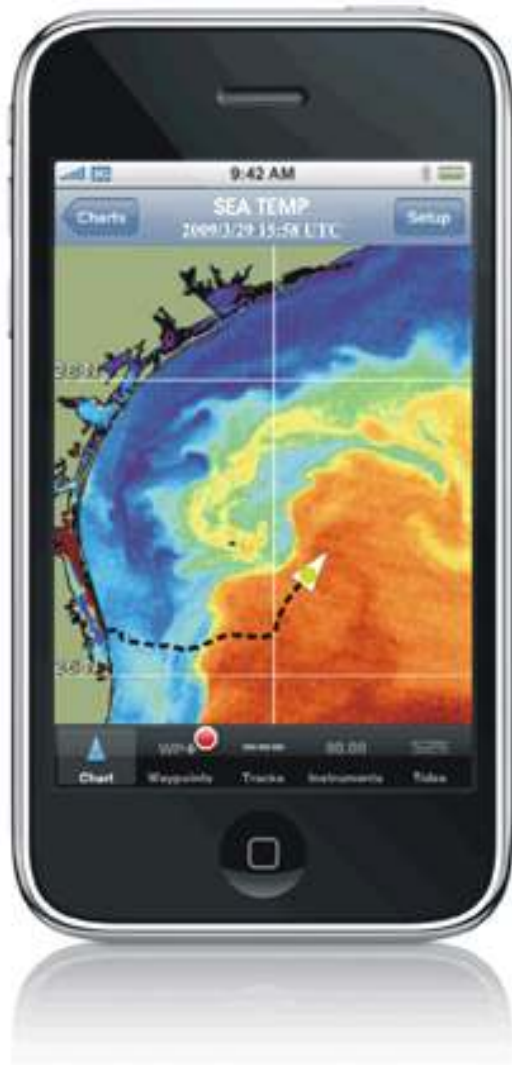

Hilton’s Realtime-Navigator maps are expected to be live in the Fugawi X-Traversal system in May of 2009.

For more information on Hilton’s Realtime-Navigator support, Fugawi X-Traversal, or to learn more about Northport Systems and its entire product line, please contact (416) 920-9300 or visit www.fugawi.com or www.x-traverse.com.

About Fugawi X-Traversal:

Fugawi X-Traversal (www.x-traverse.com) is designed for marine and outdoor enthusiasts who enjoy flexible charting and planning. The innovative web application enables users of mobile software to exchange data with PC or Mac based software. X-Traversal provides seamless waypoint transfer between an iPhone or iPod Touch and a PC or Mac, and allows users to safely save, retrieve and move data without cabling between a desktop and a mobile device. X-Traversal also facilitates the direct download of Fugawi Tourtel Maps to a variety of desktop and mobile application. A regularly updated list of compatible applications, supported handsets, and available maps and chart can be accessed on the X-Traversal website.
